

Sweet Pepper Exhibit

Image: Jessica Bessin, Horticulture Extension Agent for Mercer County

The sweet pepper exhibit allows you to display a variety of sweet pepper that you have grown in your garden. In horticulture, the word “variety” refers to a plant that is slightly different from other plants of its kind. There are many varieties of sweet peppers available besides the popular sweet banana pepper, such as Cubanelle, pimento, and lunchbox.

The sweet pepper exhibit is judged on three criteria including quality, uniformity, and required number of specimen.

Tips to Consider When Displaying Your Peppers

- Five specimens of the same variety are required for this exhibit.
- Select peppers free of insect damage, disease, and mishandling (free of cuts, bruises, etc.).
- Only exhibit peppers that have been thoroughly cleaned.
- Display peppers that are at the perfect stage for eating. Do not include peppers that are under ripe or over ripe.
- Avoid peppers that are shriveled or have blemishes.
- Select peppers that are the same size, shape, color, degree of maturity and displayed in the same manner. All specimens in an exhibit should show uniformity.
- Do not remove stems from your peppers. Stems should remain on peppers when being displayed.

Visit the 4-H Horticulture webpage, <https://4-h.ca.uky.edu/content/horticulture> for the Kentucky State Fair guidelines and scoresheet for this project.

Project Idea

Grow several different varieties of sweet peppers. Which is your favorite? Why?

Materials Needed

- White paper plate
- Sealable plastic bag
- Five sweet peppers

State Fair Project Information

- Division 6015: 4-H Horticulture and Plant Science
- Class 580: Peppers, sweet (five per plate)
