Preface

The 2008 version of the Kentucky Secondary Wood Industries Directory was prepared by personnel at the University of Kentucky's Department of Forestry and the Kentucky Division of Forestry. This directory contains information about markets for green and kiln dried lumber and other related products. The directory has three sections: Alphabetical Index, Geographical Listing by County, and Product Type Index.

The information in this directory is based upon information collected by the University of Kentucky's Department of Forestry and the Kentucky Division of Forestry employees. The information was collected from phone calls, plant visits, and correspondence. Inclusion in the directory does not constitute recommendation by the University of Kentucky or the Division of Forestry. Likewise, omission of a company in the listing does not reflect any firm's activities. If your business has not been included here, please use the form enclosed to provide us with the pertinent information.

I offer my thanks to all Division of Forestry personnel, and Bobby Ammerman, Carroll Fackler, and Rosalee Bradley with the University of Kentucky who worked to make possible this version of the Secondary Wood Industries Directory of Kentucky.

Sincerely,

Leah W. MacSwords, Director
Kentucky Division of Forestry
Secondary Wood Industry Profile

Much discussion has taken place over the years to define what is primary and secondary wood industries without any real conclusion. We chose to define secondary wood manufacturers as those manufacturers that convert green lumber or green material into higher value products. This can include wood products such as, furniture and cabinets, but can also include mulch and even electricity.

At the time of publication, this directory included 581 companies employing 18,946 workers. The number of workers is based upon data supplied by participating companies on a given date and may not be exact on a daily basis. The largest group by product type is Cabinets which includes custom cabinets and mass-produced cabinets with 3804 employees, followed by Millwork with 2238 employees. Pallets/Crating is the third largest group with Flooring (including pre-finished, strip, remanufactured, and wide plank) as the fourth largest group. The fifth largest secondary wood industry group is Pulp with 1020 employees. The average number of employees for all companies is 33.

The information listed in the publication is current information as of October 19, 2007. If there are corrections that need to be made, please complete the enclosed form and mail to Bobby Ammerman, University of Kentucky, Department of Forestry, 130 Robinson Road, Jackson, KY 41339 or fax to 606-666-2215.
Note to Directory Recipients

Please verify your company’s information as listed and indicate any changes on the form below and fax to Bobby Ammerman at 606-666-2215.
